

WHAT LIES BEYOND DIGITAL TRANSFORMATION?

INNOVATION TO CREATE INTELLIGENT ENTERPRISES

Top disruptors are getting ready for the future with Infosys Innov8

THE INFOSYS INNOV8 ADVANTAGE

MEET JULIA – A dynamic CIO who wants to build an intelligent enterprise with new capabilities. She knows that without intelligent reinvention, her company will find it hard to stay relevant.

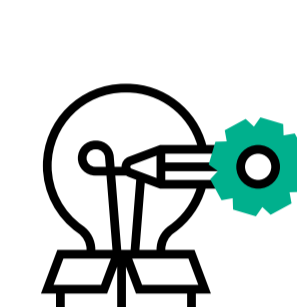

JULIA'S TOPMOST CHALLENGES

THE INFOSYS INNOV8 PROMISE

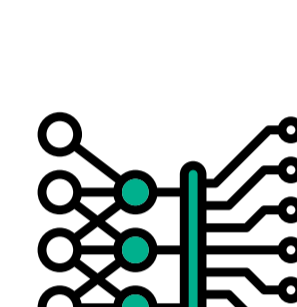

How to ensure business sustainability in the changing market environment?

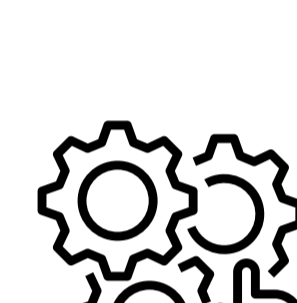

How to embrace tomorrow's business models?

Where and how to start building digital intelligence?

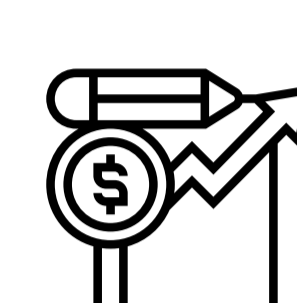

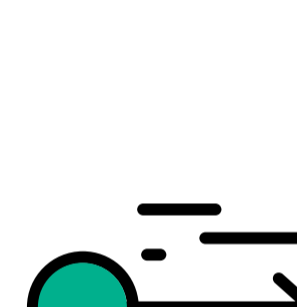

How do I unlock enhanced experience for customers and employees?

Will my investments generate the expected business results?

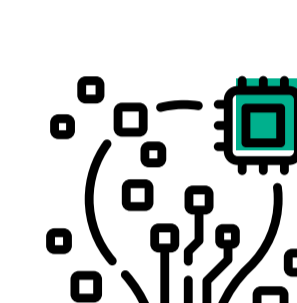

Where can I find the right talent to drive this strategic vision?

Empower next-gen business processes and people.

Co-create with Infosys Living Labs.

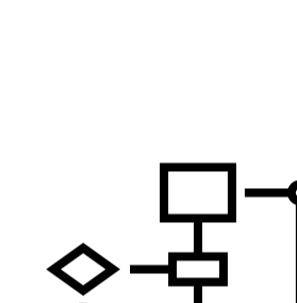

Embed deep learning, AI, ML, IoT, blockchain without business disruption.

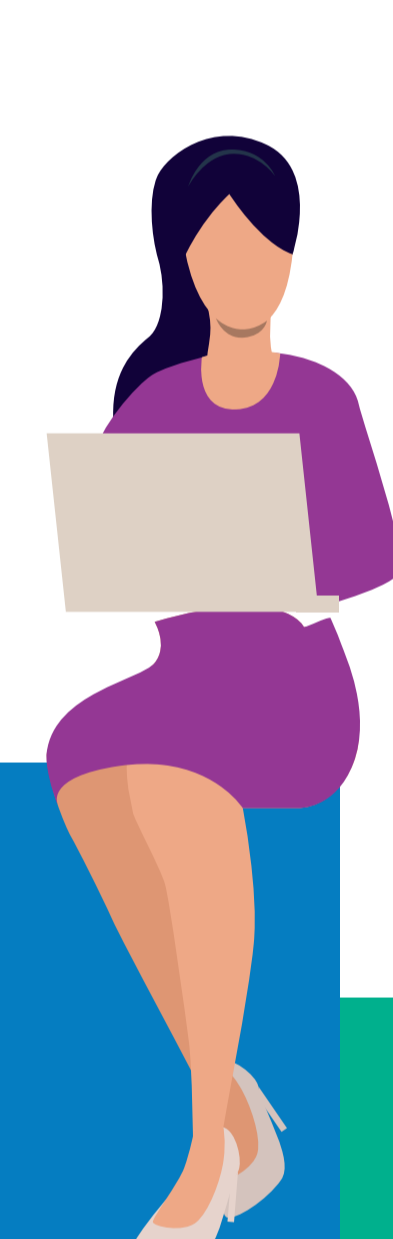

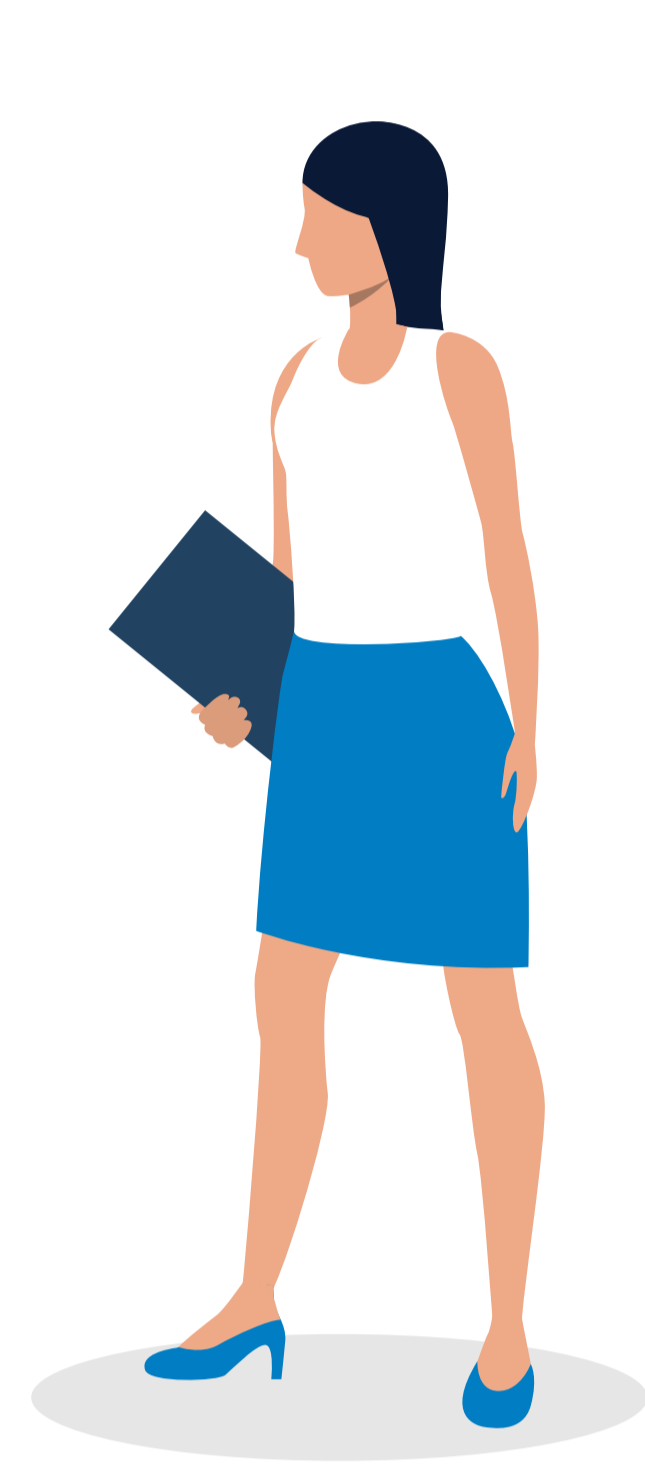

Apply automation, analytics and design thinking for the best outcomes.

Run with flat-lined costs to maximize return on investments.

Leverage the world's best SAP and AI talent pool to accelerate innovation.

Julia was walking the tightrope between the opportunities and the risks associated with landscape transformation.

What Julia wanted to Achieve

- Cloud as a driver
- Digital intelligence
- Refreshed business models
- Redefined customer experience

What Julia found under the hood of Infosys Innov8

- Experience analytics
- Hyperscaler cloud platform
- Intelligent technology applications
- Infosys Catalyst - preconfigured industry solution
- SAP business services and hyperscale native ML/IoT/blockchain

First, Julia identified the right areas in consultation with Infosys to begin transformation. Then, she scaled these enterprise-wide with Infosys Innov8.

HOW THE INFOSYS INNOV8 PROGRAM WORKS
