

# MODERN DATA PLATFORM FOR SAP CUSTOMERS ON SNOWFLAKE

Many SAP customers are driving SAP S/4HANA adoption and analytics landscape modernization to stay competitive and resilient. Data estate modernization is the top priority for enterprises to realize value from their data. Businesses have several key objectives for their data modernization as shown in Figure 1.

## Key Objectives

Figure 1 – Key objectives

## Overview

Infosys helps enterprises transform their analytics landscape and overcome challenges posed by aging analytics systems. Our solutions help customers:

- Define their data estate modernization strategy

- Set up a modern platform with deep simplification using the Infosys playbook
- Accelerate value generation with a range of intelligent solutions that deliver deep insights by connecting data
- Accelerate business processes by embedding analytics

The modernization offering has three key pillars as shown in Figure 2:

- Data estate modernization strategy services
- Cloud data platform engineering services
- Augmented intelligence solutions enablement services

The offering helps SAP customers to modernize data estate on Hyperscalers, Snowflake, BTP & generate value from data

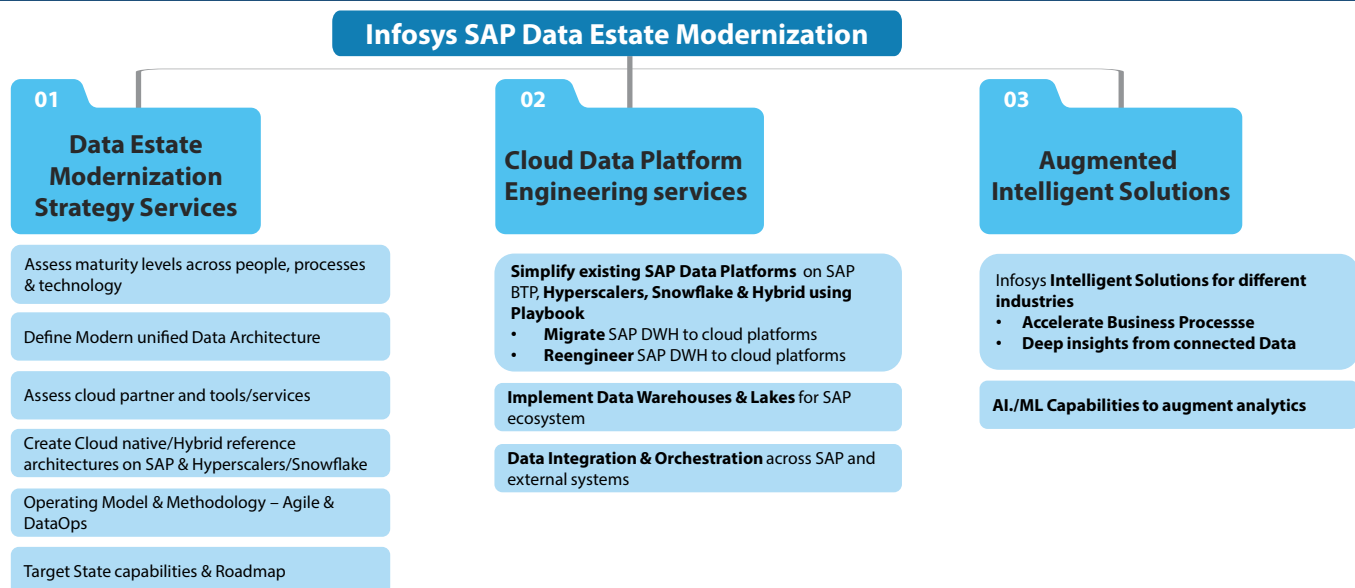

Figure 2 – Key pillars of Infosys SAP data estate modernization services

## Features

Ability to adopt incremental functionality through distinct yet integrated functional blocks

Built on the cloud and leverages native SAP integration for data orchestrations and seamless integration into non-SAP data

Non-disruptive with the ability to leverage existing investments in SAP data warehouse

## Enablers

- Robust data estate modernization strategy with proven assessment framework and capability maturity model, reference architecture, and reference operating models
- Faster migration and re-engineering with Infosys SAP Data Objects Migration Workbench for customers migrating existing SAP data warehouses to the cloud
- Seamless integration of SAP data using Infosys information grid and framework
- Pre-delivered data models and business content with cloud-native architecture to unlock value from SAP data faster and reduce design efforts
- Fast value realization with industry and line of business specific intelligent solutions leveraging AI/ML. Solutions include predictive on-time and in-full for Consumer Product Goods, inventory optimization, and intelligent customer insights for utilities

## Benefits

Future-ready data platform foundation for advanced use cases

Accelerated value from data leveraging augmented intelligent solutions

Deeper insights by seamlessly combining SAP data and external data

Prescriptive analytics to accelerate and optimize business processes

Simplification leading to operational ease and reduced TCO
