

INFOSYS
GOOGLE
CLOUD
SERVICES

Overview

Infosys in partnership with Google Cloud designs and develops cloud transformation and migration services for enterprises across industries. Infosys offers solutions and services on Google Cloud, creating a scalable, on-demand cloud model that will help enterprises navigate digital transformation and adopt a cloud-first strategy.

Together, Infosys has built artificial intelligence and machine learning-driven industry-specific solutions on Google Cloud that are foundational to digitizing the data supply chain, such as Analytics Workbench, which augments data platforms to deliver end-to-end self-service capabilities, Information Grid, which provides a data pipeline for seamless

movement of data to Google Cloud, and Customer Genome, a holistic offering that helps enterprises build a self-service driven and entity-centric foundation for explorative, predictive and prescriptive analytics.

Infosys Google Relationship

Infosys is a Google Cloud Managed Service Provider (MSP). As a qualified MSP, Infosys offers clients full application lifecycle services with its deep cloud and data analytics expertise. This includes consulting, assessment, migration, optimization and support services for enterprises looking to optimize their workloads on the Google Cloud. Infosys offers industry-specific solutions on Google Cloud for healthcare, financial services, insurance, telecom and retail industries.
