

# LET'S NAVIGATE NEXT, TOGETHER

With Palo Alto Networks & Infosys

## The state of enterprise cybersecurity challenges

The digital landscape has transformed, requiring enterprises to adopt a new approach to security. With hybrid work here to stay, users can now work from anywhere, at any time, and across any device and app. The shift to cloud has also accelerated resulting in increased operations in hybrid, multi-cloud estates. However, the number of sophisticated large-scale cyber-attacks are rising, and businesses are impeded as attackers exploit the security gaps in point products.

## Enterprises must adopt a proactive cybersecurity strategy in order to

Understand the threat landscape and know what's at stake	Be equipped to prevent, detect and effectively respond to all threats across every vector—network, cloud, endpoints and software supply chain	Maximize security efficacy while optimizing total cost of ownership

Together, Palo Alto Networks and Infosys secure complex and mission-critical environments for our largest global accounts leveraging our joint product and service offerings across Network Security, Cloud Security, Endpoint Security and Security Operations.
