

# ACTIONABLE INSIGHTS TO ACTIONS.

WITH INFOSYS AGENTIC  
FOUNDRY, PART OF  
INFOSYS TOPAZ™

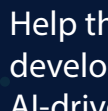

## HELPING ENTERPRISES THINK. ACT. EVOLVE.

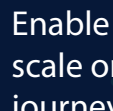

With a comprehensive collection of reusable components, and a growing repository of pre-built horizontal and vertical enterprise AI agents, we:

Empower organizations with data-driven insights and intelligent actions.

Help them to discover, shortlist, develop, deploy, monitor, and measure AI-driven initiatives effectively.

Enable enterprise-wide scale on their agentic AI journey, responsibly.

## TOOLS FOR TRANSFORMATION

**Agent-as-a-Service**  
Framework-based for easy setup and multi-model access.

**Pro-code Agentic Solutions**  
Custom-built, autonomous agents with continuous learning.

**Vertical Agents**  
Industry-focused agents for finance, healthcare, retail, and more.

**Horizontal Agents**  
Multi-use agents for tasks like data analysis and ticket routing.

## WHY INFOSYS AGENTIC FOUNDRY

**Well-researched industry use cases**  
The agents are built based on our industry experience and by leveraging over 20 industry blueprints.

**Service-as-Software**  
The agents are designed to be flexible, scalable, and easily integrated into existing systems, embedding enterprise AI agents and AI agentic workflows across enterprise services and functions.

**Leveraging AI-first at Infosys**  
Infosys has used the expertise garnered in-house from its AI-first strategy to build the Infosys Agentic Foundry.

**Robust and responsible evaluation frameworks**  
The agents are supplemented with mature evaluation frameworks from Infosys, which help analyze and create the data needed to power them.

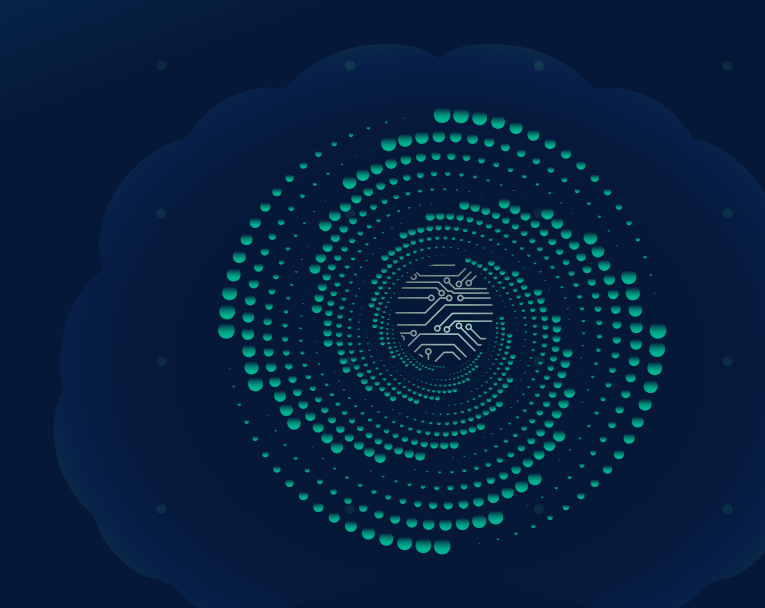

**Technology-agnostic approach**  
Infosys collaborates with partners to build and deploy AI agent frameworks, enabling customers to access the latest AI advances and integrate seamlessly with preferred platforms, including open source solutions.

**Create your own agentic platforms**  
With the expertise gained by deploying enterprise AI agents within its own ecosystem, Infosys can build agentic platforms for customers, where agents can be offered as services, for their own consumption.

## CHOOSE FROM MULTIPLE ENTERPRISE AI AGENTS

### INDUSTRY AGENTS

**Financial Services**  
Fraud detection, risk management, CRM.

**Healthcare**  
Personalized treatment plans, analytics.

**Telecom**  
Network optimization, churn prediction.

**Manufacturing**  
Quality control, predictive maintenance.

**Retail**  
Inventory management, sales forecasting.

**Insurance**  
Claims processing, risk assessment.

**Logistics**  
Route optimization, delivery tracking.

### HORIZONTAL AGENTS

**SDLC Agent**  
End-to-end software delivery orchestration.

**Jira Agent**  
Project management and issue tracking automation.

**QA RAG Agent**  
Targeted test case generation.

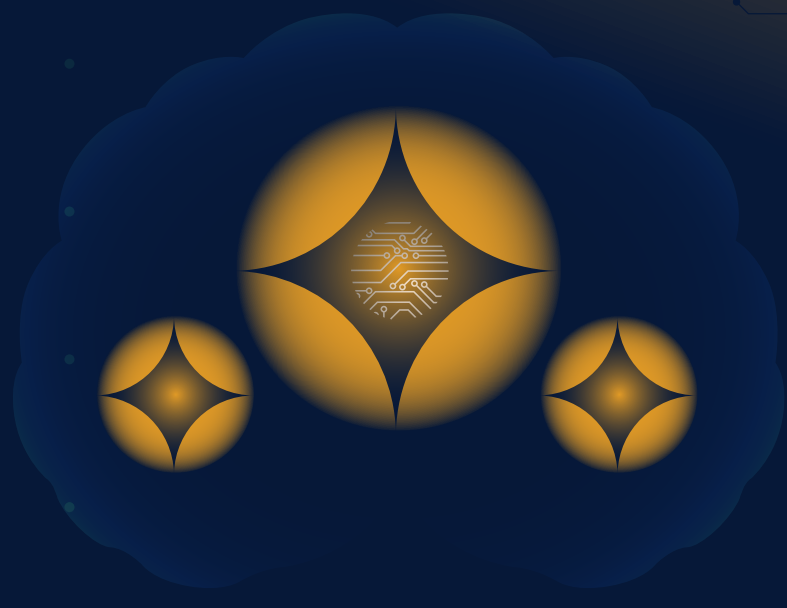

**Code Generation**  
Automatic code generation and optimization.

**Text-to-SQL**  
Natural language to database query conversion.

**Onboarding Agent**  
Business operations and workflow automation.

## HELPING ENTERPRISES SUCCEED

**Faster Support Resolution Times**  
for a technology major via deep research agents that deliver product insights.

**Enhanced Financial Record Integrity**  
for a leading service company with agents to enable audit automation.

**Significant Productivity Increase**  
for Infosys' own finance operations with multi-agent invoice automation.

## THINK. ACT. EVOLVE. AI YOUR ENTERPRISE

Revolutionize workflows, boost ROI, and future-proof your enterprise. With no technology lock-in, embrace and transform with agentic AI in an ethical and responsible manner.
