ACCELERATING DIGITAL PROCUREMENT TRANSFORMATION FOR THE FUTURE READY ENTERPRISE

Global supply chains are on the brink of a transformation journey that will revolutionize the way companies have been managing their supply chains. The enablers for this transformation are a series of next generation offerings that forms the DNA of "Digital Supply Chains". Cloud offerings, AI & RPA, IP based solutions, Blockchain and API

economy are the key technology trends that are driving Connectivity, Intelligence, Scalability and Speed into the supply chains.

In the New Gen Sourcing & Procurement domain, digital supply networks and procurement driven by analytics is gaining paramount importance. Similarly,

other aspects of "Digital Procurement Transformation" include a 360 – degree view of suppliers, ease of supplier collaboration & management, seamless integration within procurement processes, and a simplified buying process with an enhanced user experience and compliance.

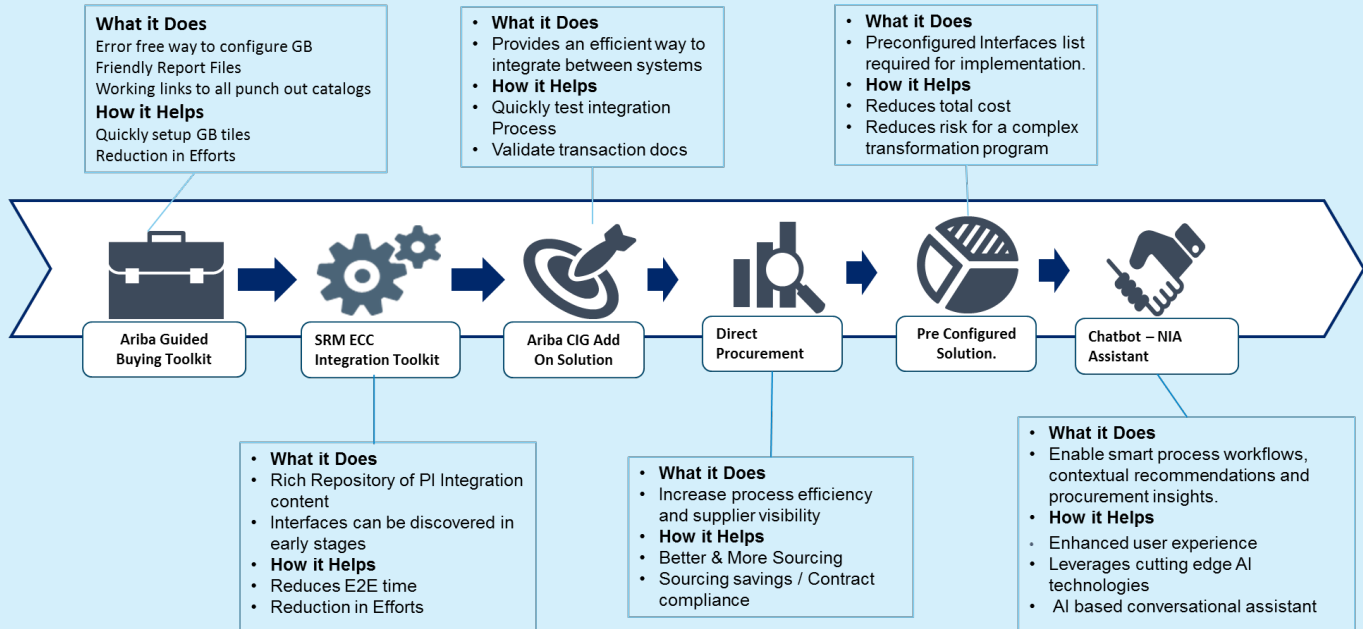

Ariba combined with mobility, analytics, and application intelligence are central to the rise of smart procurement. With SAP Ariba, you get a nimble, modern approach to managing procurement and supply chain data assets. SAP Ariba's Intelligent Spend Management can help you understand and use that

data, transforming it from information into intelligence, and intelligence into value. The kind of value that comes from helping your organization quickly adapt to changing needs, drive change, and adopt new business models. Ariba Network provides customers with insights and intelligence made possible

by the biggest and best dataset of business commerce transactions between buyers and suppliers. SAP Ariba equips organizations to expand beyond cost-focused procurement and supply chain metrics to more strategic business priorities.

Infosys: Enabling Digital Sourcing & Procurement

Infosys Procurement Practice @ EAIS is 17+ years old with over 200+ techno functional consultants. We have tools and accelerators to implement solutions in weeks to months.

What it Does
Error free way to configure GB
Friendly Report Files
Working links to all punch out catalogs
How it Helps
Quickly setup GB tiles
Reduction in Efforts

- **What it Does**
- Provides an efficient way to integrate between systems
- **How it Helps**
- Quickly test integration Process
- Validate transaction docs

- **What it Does**
- Preconfigured Interfaces list required for implementation.
- **How it Helps**
- Reduces total cost
- Reduces risk for a complex transformation program

| Ariba Guided Buying Toolkit | SRM ECC Integration Toolkit | Ariba CIG Add On Solution | Direct Procurement | Pre Configured Solution. | Chatbot – NIA Assistant |

- **What it Does**
- Rich Repository of PI Integration content
- Interfaces can be discovered in early stages
- **How it Helps**
- Reduces E2E time
- Reduction in Efforts

- **What it Does**
- Increase process efficiency and supplier visibility
- **How it Helps**
- Better & More Sourcing
- Sourcing savings / Contract compliance

- **What it Does**
- Enable smart process workflows, contextual recommendations and procurement insights.
- **How it Helps**
- Enhanced user experience
- Leverages cutting edge AI technologies
- AI based conversational assistant

Key New Offerings

- SLP(Supplier Lifecycle) and GB(Guided Buying) solutions are new functionalities released in SAP Ariba

- SAP Ariba Cloud Integration Gateway(CIG) enabled by SAP Cloud Platform Integration(CPI) integrates SAP Ariba solutions into existing customer infrastructure

- SLP enhances speed and consistency due to integration with other procurement processes, provides a flexible matrix for qualification and segmentation and gives the supplier a 360-degree comprehensive view while keeping the vendor data current

- GB increases user engagement across all spend areas, compliance is made simpler, supplier collaboration becomes efficient with ease in supplier management

- We have recently successfully concluded the implementation of these modules for many clients based out of US, EUR & ROW
