

# SMART INTEGRATED SALES ACCELERATION SUITE (SISAS)

## Introduction

Over the years, our interactions with customers have made us aware of the challenges they face when accelerating their sales process through channel partners. Although many companies possess CPQ solution(s), they have not extended it to their channel partners in the most efficient way. To help such companies digitize and accelerate their sales process, Infosys partnered with Yagna IQ to create the Smart Integrated Sales Acceleration Suite (SISAS).

SISAS is an innovative platform that can be integrated with existing CPQ platforms to extend to channel partners with new generation features that will transform your B2B business. With the SISAS platform, you can overcome the shortcomings of traditional CPQ platform(s) and provide channel partners the opportunity to configure and sell your products more efficiently.

## Challenges with Core CPQ, SISAS can Solve...

Many companies implemented CPQ solutions based on business requirements and use cases then. However, these solutions have not kept pace with changes in products portfolio, business model and increasing competition. As a result, they lack some of the key features of modern CPQ solutions.

SISAS is an attempt by Infosys in partnership with Yagna IQ to help companies bridge the gap between existing and modern CPQ solutions.

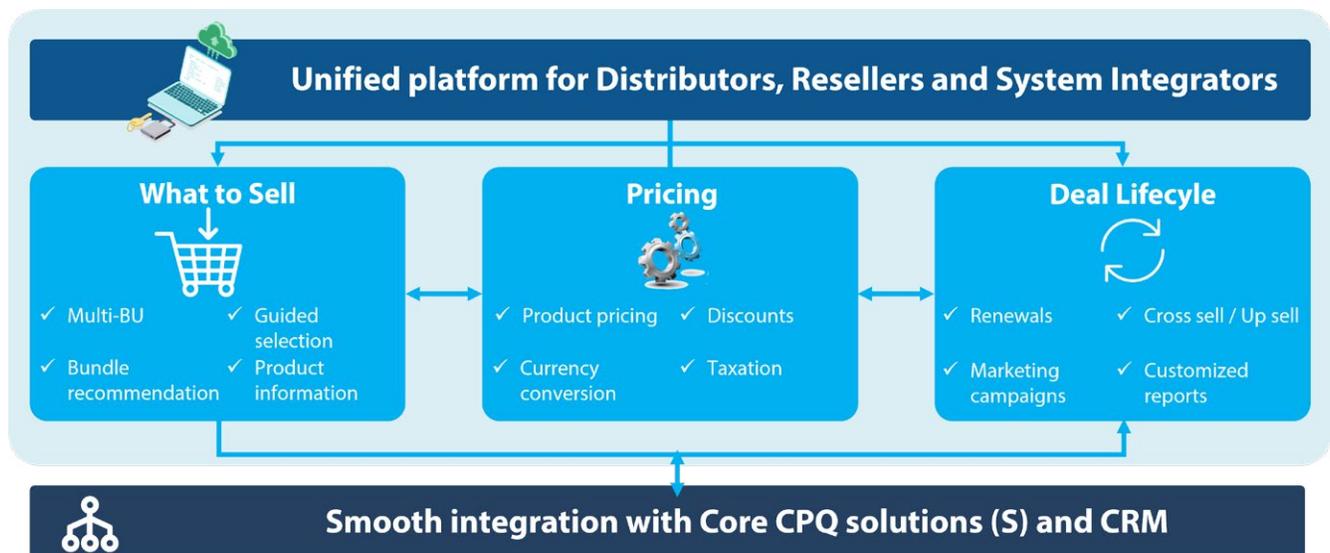

## How SISAS Works?

SISAS will integrate CPQ platform(s) providing users with a unified experience and a single point of entry for your channel partners.

SISAS, being an independent platform, integrates with different CPQs but does not share data with the core CPQ running at the product manufacturers without explicit approvals from the channel. This fosters trust with the channel and will make it easy for channel partners to conduct business with you.

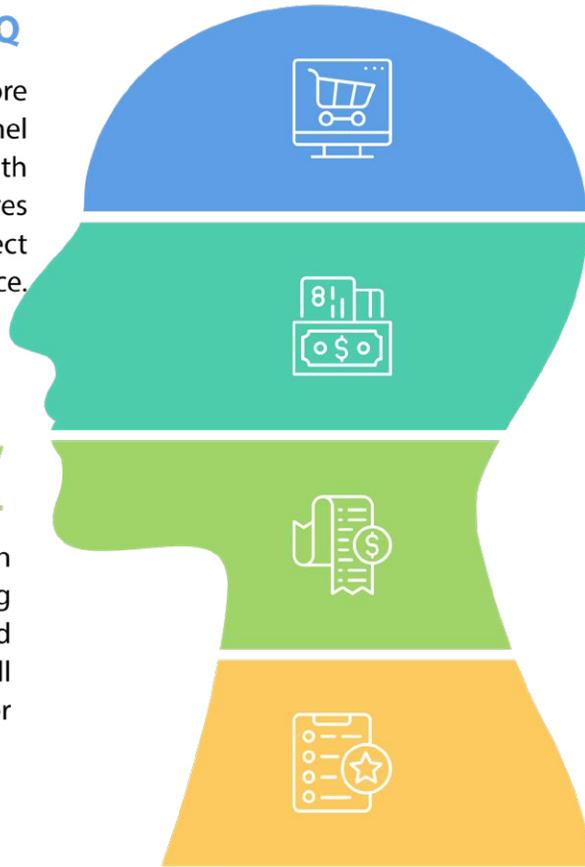

# SISAS High-level Features

## CHANNEL CPQ

Extend your core CPQ to channel partners with additional features and project management space.

## CROSS SELL / UP SELL

Recommendation based on buying pattern and historical install base of a customer

## RENEWALS

With zero touch renewals, increase on time renewal by 30 - 50 %

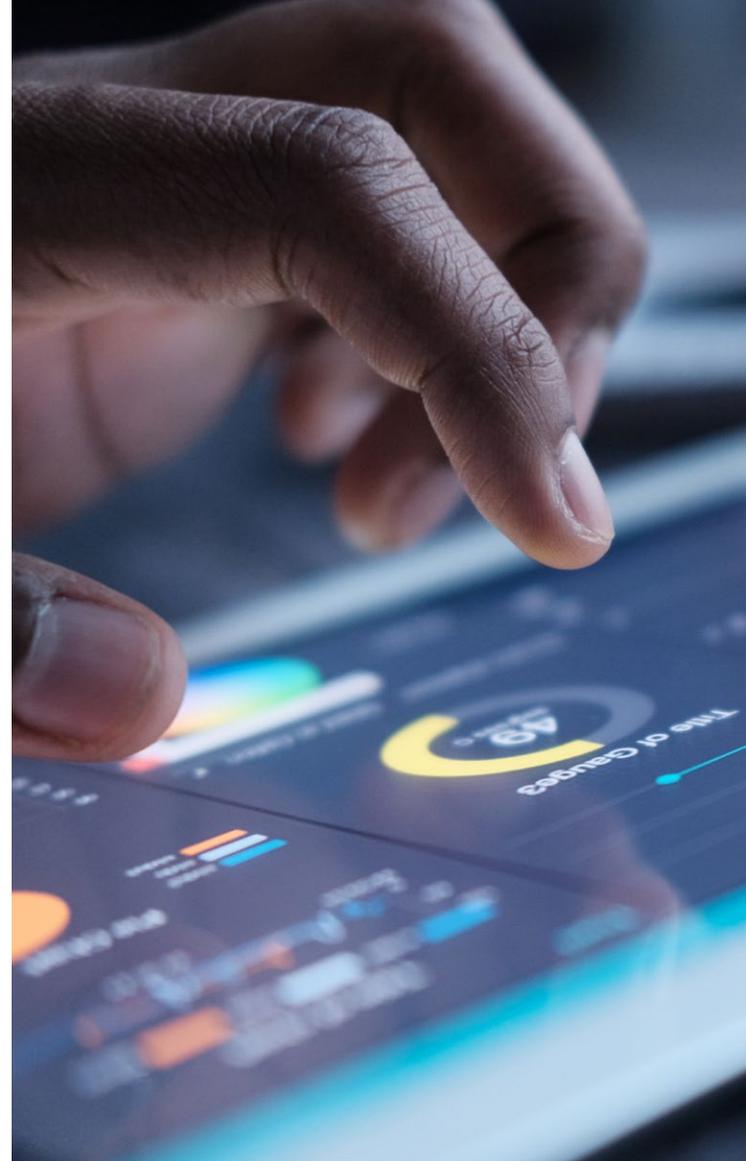

## SMART ANALYTICS

Install base explorer, churn analytics, RFM based customer profiling

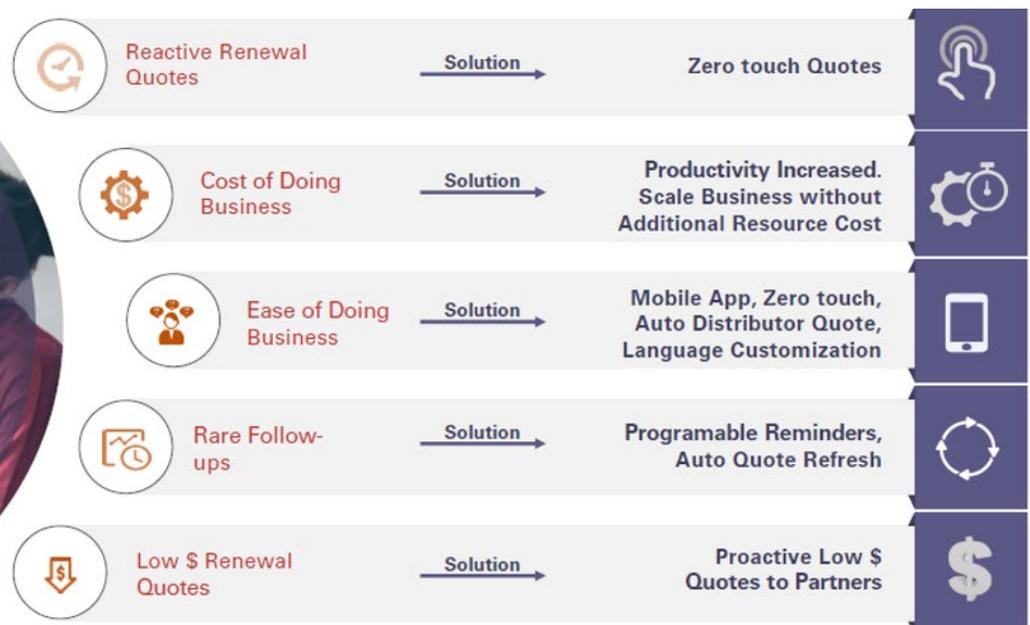

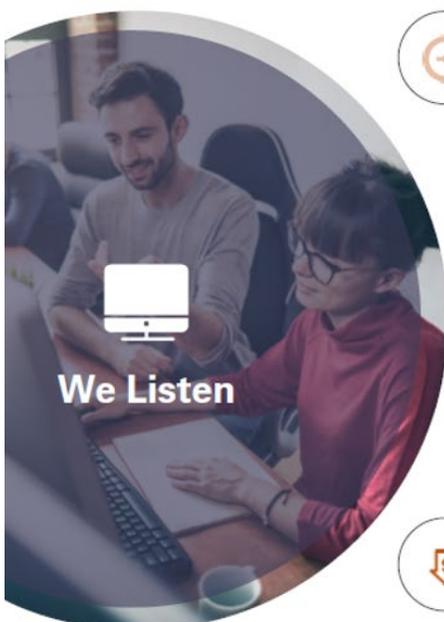

## Channel CPQ

	<p><b>Product Store</b>                  Upload product                  AI / ML based product recommendation                  Associating attributes to products                  CNET integration for product info</p>
	<p><b>Discount /Margin</b>                  Defining discount / margin profile                  Discount / margin based on rule                  Discount / margin stack up rules                  Margin approval and control</p>
	<p><b>Quotation</b>                  Guided selling workflow for quote creation.                  Define quote validation with custom T&amp;C                  Custom template                  Management for quote / proposal</p>
	<p><b>Pricing</b>                  Define different pricelist for set of target audience                  Live currency exchange fetched from open exchange                  Define price validation                  Attribute based pricing</p>
	<p><b>Taxation</b>                  Defining tax profile                  Single as well as double taxation                  Different formula for tax                  Calculation e.g.: simple, gross up</p>

## Zero Touch Renewals

## Cross Sell / Up Sell

### Identify Opportunity and Sell to New Customers

#### Net New Logo

- Identifying New Customer based on the complimentary Vendor data
