

INFOSYS PRODUCT COST OPTIMIZATION

Overview

The primary objective of the Infosys Product Cost Optimization (PCO) solution is to optimize the cost by adding value at various stages of product development, production and sustenance. Our solutions around cost estimation, value engineering, benchmarking

and sourcing help clients to optimize across the value chain, keeping costs on target and making products competitive. Our PCO platform along with commercial tools support these solutions to enable organizations optimize in the new normal.

Why PCO?

- Pressure on profit margins
- Prolonged vendor negotiations
- High COGS on legacy program/ product

- Chronically poor supplier performance posing potential risk
- Fair price for your part / product sourcing
- Cost overruns on NPDs

Our Solutions

Our Credentials

- Proven framework and established process
- Cross-industry expertise
- Cost savings across engineering, manufacturing and supply chain
- Rich experience on aero structures, systems, avionics, software, hardware and electrical components
- Automated and bulk costing capabilities
- Accurate estimates that empower SCM to negotiate with detailed cost break down
- Integrated suite with centralized data repository
- Knowledge models as digitized guidelines
- Multiple, customizable costing templates
- End-to-end custom automation tool-kits

Enablers

Proprietary Rate Repositories

- Labour, equipment, material across over 140 countries

Value Engineering Framework

- Established processes
- Cross functional subject matter experts

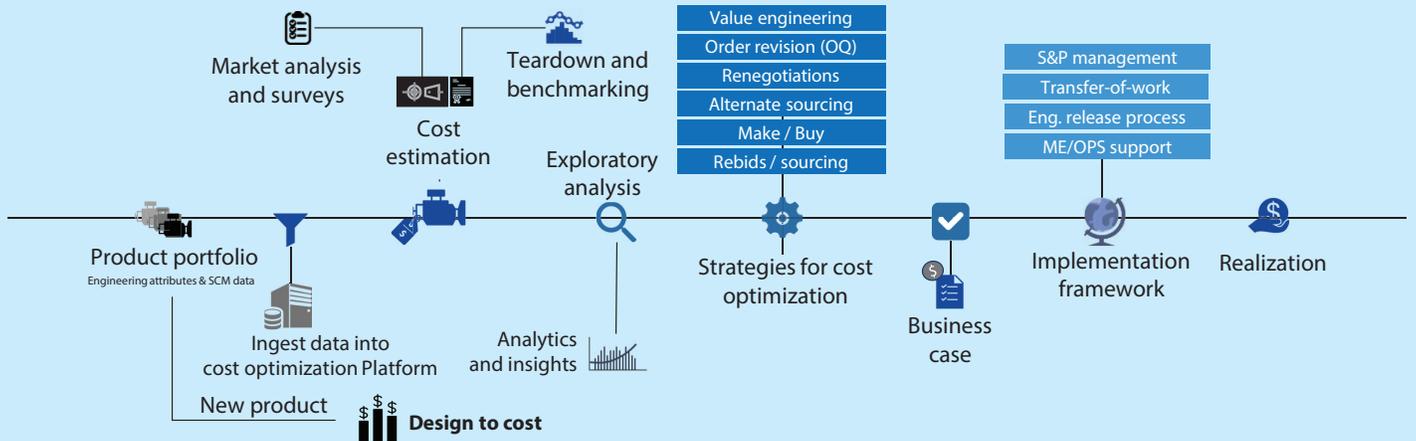

Costing Platform

- Cost estimation framework
- SME interface
- Cost monitoring

In-house Labs

- Teardown (mechanical, electronics)
- Rapid prototyping (3D printing)

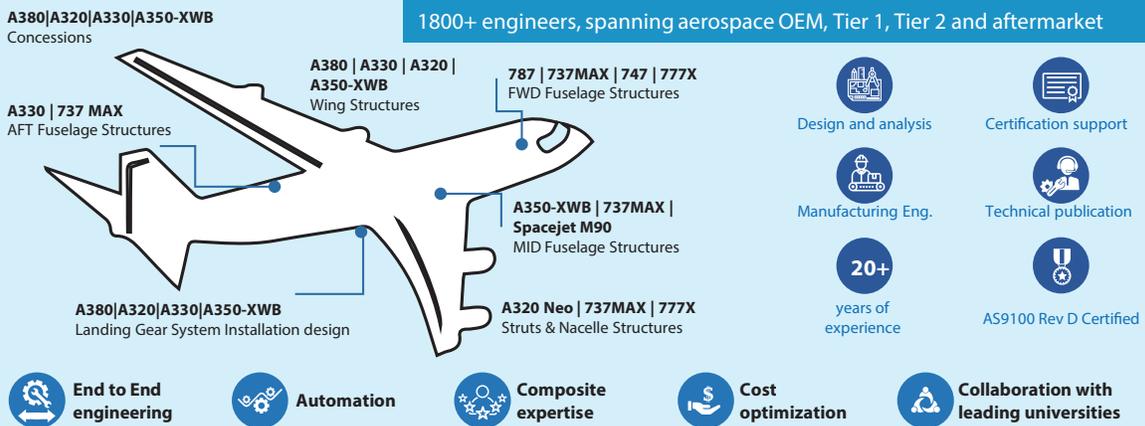

Cost Optimization Framework

Success Stories

<p>Value engineering for Tier-1 aero structure manufacturer \$250M savings across program (5 year)</p>	<ul style="list-style-type: none"> • 200+ implementable ideas generated • Idea generation to implementation including supplier liaison and obtaining change board approvals
<p>Should costing of large portfolio of aerospace parts products ~30% annual savings on SCM spend</p>	<ul style="list-style-type: none"> • 100,000+ cost reports generated for contract extension and negotiation • Collaboration with SCM team for supplier negotiation for over 80 suppliers
<p>Supply Chain Support for a major aerospace structures supplier Developed system for contract monitoring and supplier cost recovery</p>	<ul style="list-style-type: none"> • Track & monitor contract expiry • Contract renewal or transfer of work support • RF(x) and contract placement support • Supplier quality and schedule monitoring
