EMPOWER YOUR WORKFORCE

Infosys | Workplace Transformation Services

Navigate your next
Foster Collaboration for Excellence at Workplace

Enterprises have complex corporate structures and dynamic workplace needs. There are many departments, divisions, business units, locations and mobile workforces. Sharing the right information, being connected seamlessly and having an engaging experience at workplace are key to enterprises’ success as these will result in increased employee productivity and organizational efficiencies.

There is an imperative need to control and collaborate across all entities – departments, partners and operations. The Infosys Collaboration Workbench – Office 365 based tool brings the power of automation to help you quickly iterate, prototype and realize value from your investments in Office 365. It ensures optimum Office365 adoption and enhanced user experience through continuous innovation across implementation and managed services.

Three modules of the collaboration workbench

Workbench, with its predefined workstyle-specific design templates, automated site provisioning scripts, personalized multi-lingual support ensures consistent experience and, reduces the process thinking time and deployment efforts. It simplifies the setting up of enterprise collaboration platforms with preconfigured templates, components from app store and UX themes. With workbench, enterprises can quickly measure the effectiveness of their employee experience initiatives, and collaborate seamlessly.

Apps catalog helps address common enterprise demands related to ideation portals, knowledge management, and policy repositories faster. The Apps catalog - a repository of feature-rich, functional, reusable and context-aware applications – play a big role here. These apps are plug and play conveniences that bring down configuration time considerably. Chatbots integrated with these apps make the user experience immersive. Also, Search as an integrated service makes finding content, people & resources much simpler.

Sample Design Templates powered by Apps catalog
Governance dashboard provides a consolidated view of the Office 365 tenant to administrators. It provides the high level statistics around site and licensing usage to monitor overall consumption. It analyses the user activities to ensure they are well within the corporate guidelines and generates alerts in case of any security breach. This dashboard facilitates comprehensive reporting to provide detailed insights on user activities, usage details and security related incidents. This reporting is further backed by analytics enabling admins to take well informed decision and maintain governance.

**Benefits**

- Accelerated go-live with pre-defined templates and automation scripts, reducing process thinking and deployment efforts by 35%
