In today's dynamic business landscape, the efficient management of mobile devices has become paramount. As Mac OS devices continue to gain popularity within enterprises, capturing 15% of the market share, the need for robust device management solutions for Apple devices has grown exponentially. These solutions are essential for ensuring the security, productivity, and compliance of Mac devices within organizations.

As organizations become more mobile and distributed, IT and security teams are confronted with a growing set of challenges:

### Diverse Device Ecosystem

Managing a mix of PCs, laptops, and mobile devices creates complexity and potential security gaps

### Tedious Software Distribution

Deploying and updating applications across various Mac models and OS versions can be a time-intensive process

### Security Concerns

Ensuring consistent security policies across all devices for a robust and safe operational environment

### Compliance and Reporting

Maintaining regulatory compliance and generating comprehensive reports across mixed device environments is challenging

### Integration with Existing Infra

Incorporating Mac management into existing IT systems and workflows

# Unleashing the Power of Microsoft Intune + Jamf Integration for a Comprehensive Mac Management

Microsoft Intune provides robust capabilities for managing Mac devices, establishing a solid foundation for core enterprise needs. Jamf is a complimentary solution to Intune that offers advanced features for organizations with specialized Mac management requirements. Amalgamation of these two powerful solutions provide a comprehensive and unified management approach that combines the best of both worlds.

## Jamf for Advance Management

- Zero-Day Support
- Advanced Apple Ecosystem Integration
- Sophisticated Software Management
- Extended Scripting Capabilities
- Hardware & Inventory Management
- Specialized Compliance and Security
- Inbuilt Packaging Tool – Jamf Composer
- Custom Compliance Benchmark Settings
- Support for Shared Use Macs
- Simplified Onboarding Experience
- Jamf Pro's MacOS Agent

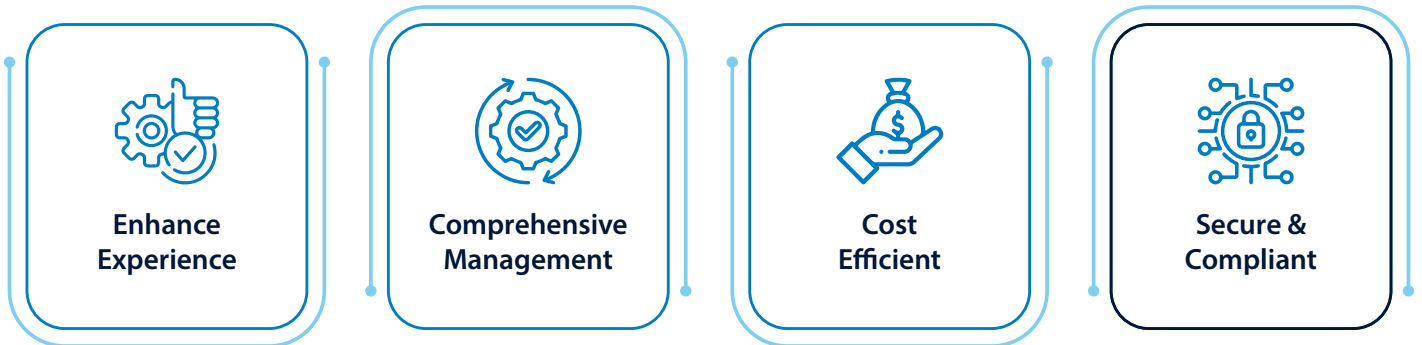

## Microsoft Intune for Core Management

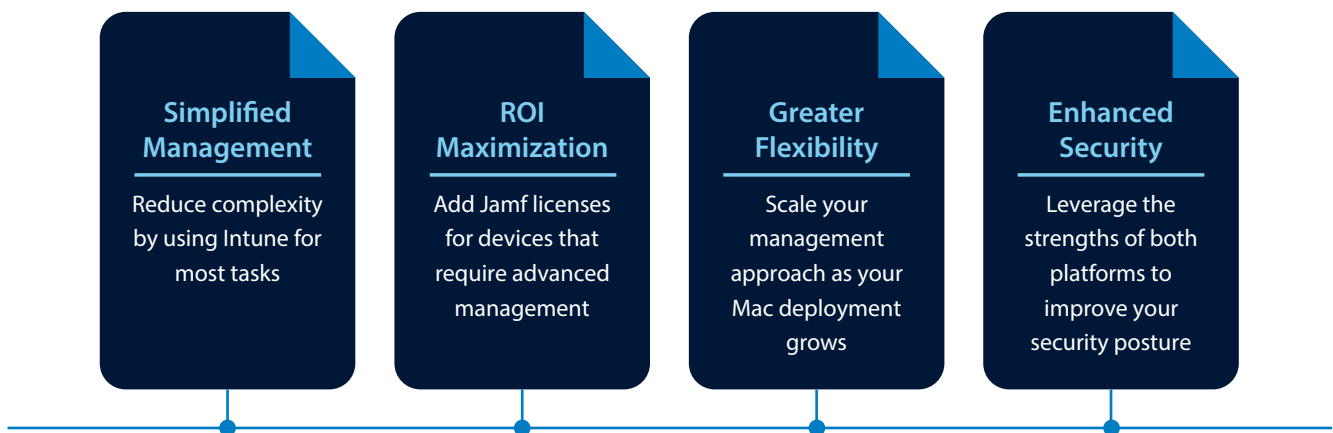

- Device Enrollment
- Configuration Profiles
- App Deployment
- Security Policies
- Compliance Policies
- Conditional Access

## Comprehensive Management: Microsoft Intune + Jamf

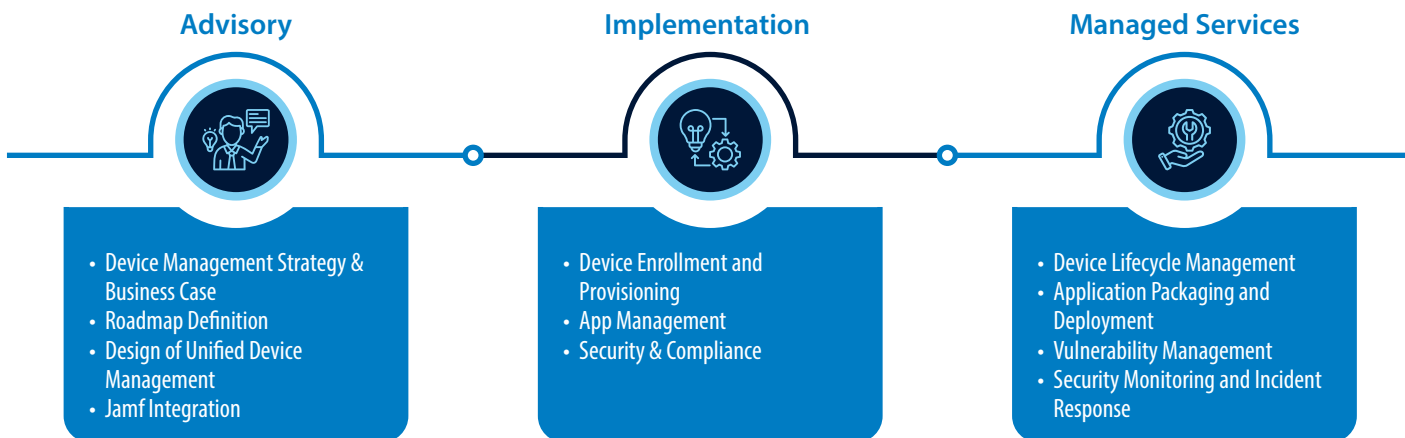

By starting with Intune and selectively adding Jamf for advanced use cases, you can create a robust, efficient, and scalable environment for managing Mac devices. This approach not only addresses current challenges but also prepares your IT infrastructure for future growth.

## Infosys' Holistic Service Offerings for Mac Device Management

Our deep understanding of enterprise device management allows us to deliver tailored solutions that seamlessly integrate Microsoft Intune and Jamf into existing IT infrastructure. From initial assessment to ongoing support, Infosys provide comprehensive services to optimize your Mac device management processes.

By implementing these services, organizations can enjoy streamlined device provision and support, centralized device management, and compliance policies. organizations can effectively protect sensitive data, enhance employee efficiency, reduce costs, and adhere to industry regulations.

## Infosys Success Stories

**Semiconductor Leader Achieves Mac Fleet Excellence**

Infosys integrated Intune for 3000+ Apple devices, orchestrated Jamf Pro for centralized control, streamlined software deployment with engineered AutoPKG, and implemented proactive vulnerability management protocols.

**Outcomes:**

- Consistent achievement of vulnerability management targets
- Deployed MacOS updates within 5 days of release
- Seamless management of multi-vendor app ecosystem

**Streamlined MacBook Operations for American Commercial Bank**

Infosys comprehensively provided EUC operations support and managed MacBook operations, including application deployment, OS updates, and security. They leveraged Jamf for application packaging, OS updates, and vulnerability management.

**Outcomes:**

- Improved efficiency
- Enhanced security
- Enhanced user experience

**Urban Mobility Innovator Embraces Modern Device Management**

Infosys deployed Intune and Jamf Composer for Advanced application control for 200+ MacOS devices along with Engineered and managed support.

**Outcomes:**

- Optimized application lifecycle management
- Ensured continuous security compliance
- Improved device update process
- Enhanced software distribution control

Infosys Cobalt is a set of services, solutions and platforms for enterprises to accelerate their cloud journey. It offers over 35,000 cloud assets, over 300 industry cloud solution blueprints and a thriving community of cloud business and technology practitioners to drive increased business value. With Infosys Cobalt, regulatory and security compliance, along with technical and financial governance comes baked into every solution delivered.
