

Infosys Loan Calculators

Are you worried about handling customers' loan queries and evaluating multiple systems / tools simultaneously? Here is Infosys Loan Calculators — the responsive and reusable Salesforce Lightning component in Salesforce AppExchange's ecosystem — which ensures that the Salesforce platform provides comprehensive capability to analyze and compare various loan

calculations. We offer four calculators for loan mortgage calculations, loan affordability, and comparison of auto loan or lease calculations that are ready-to-go, plug-in components, which can be embedded in any Salesforce page. They are handy tools for relationship managers (RMs) or financial advisors using the Salesforce platform.

Currently, as the AppExchange Lightning Components does not include calculators, our calculators definitely add good value. These financial calculators are very easy to use for all RMs who interact with potential customers, allowing them to make financial decisions on-the-go.

One-component package: four loan calculators

The four loan calculators that are part of the Salesforce Lightning component package, can be dragged and dropped to any Salesforce page, leading to an overall faster solution delivery.

Loan calculator

Calculates loan installments with interest and outstanding principal repayment

Home affordability calculator

Calculates loan size and term based on one's financial capability

Mortgage calculator

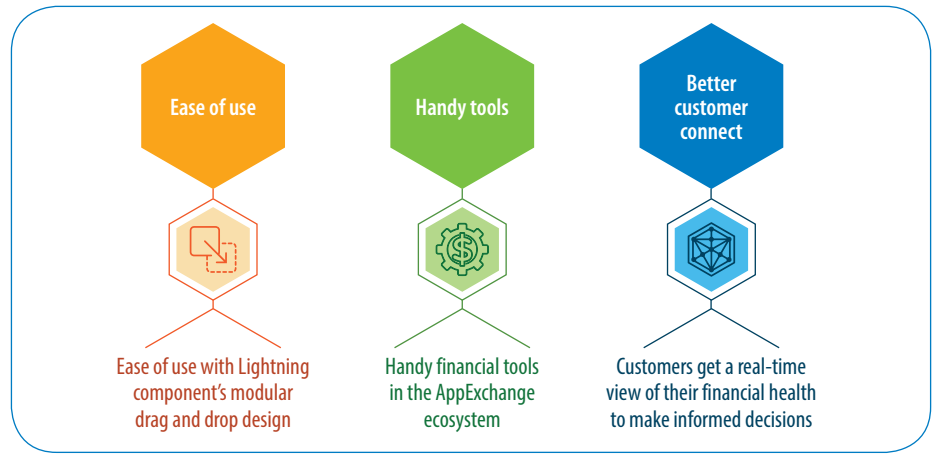

Calculates mortgage payments and associate housing cost

Auto loan or lease calculator

Recommends auto loan or leasing options based on the lower net ownership cost

Benefits

From calculating loan terms to determining better loan options, Infosys Loan Calculators provide the right financial resources that assist relationship managers to effectively advise clients about their personal or business financial decisions and build long-lasting, strong partnerships. What's more, our calculators also provide well-organized, real-time information, which drives correct decisions tailored to the needs of customers.
