

Infosys Sandbox Manager

Manage your Salesforce instances seamlessly with Infosys Sandbox Manager

Organizations are required to leverage sandboxes (also known as non-production environments for managing the software development life cycle) and keep them up to date with the

production environment via periodic refreshes to ensure their maximum effectiveness. Managing this task, however, is currently manual and very time-consuming.

Infosys Sandbox Manager is a one-stop application that every organization can leverage, to manage all the sandboxes in one place and keep them updated with production releases.

Features of Infosys Sandbox Manager:

- Enables tracking of all the sandboxes in one place
- Facilitates history tracking of sandbox refresh cycle
- Provides sandbox refresh reminder
- Aids sandbox usage trend tracking at

- the time of license renewal
- Helps organizations track their ROIs on sandbox purchases
- Gives a graphical view of information
- Has a simple and intuitive user interface

With Infosys Sandbox Manager, organizations can now manage the health of their sandboxes in one place and increase the sandbox usage insights to ensure maximum effectiveness.
