

SEIAA/COMPLIANCE-REPORT-IIPM/2023-24/01

27th October 2023

To,
Member of Secretary, SEIAA,
Forests Ecology and Environmental Department,
7th Floor, 4th Stage, M.S Building,
Dr. Ambedkar Veedhi,
Bengaluru – 560001.

Dear Sir/Madam,

Sub: Submission of Six-monthly compliance report (April 2023 to September 2023) of completed construction project at Sy. No 40(P) & 41(P) of Electronics City Phase 2 Industrial area, Konappana Agrahara, Begur Hobli, Bengaluru South taluk, Bengaluru.

Ref 1: Environmental clearance vide No. SEIAA:194: CON:2015 dated 30th May 2016

As per the requirement of the above environmental clearance, we are submitting the following half yearly reports for your perusal.

Annexure 1: Compliance report with status
Annexure 2: Ambient air quality reports
Annexure 3: Ambient noise monitoring reports
Annexure 4: DG stack monitoring reports
Annexure 5: STP water analysis reports

Kindly accept and acknowledge the receipt of the same.

Thanking you,

Yours Sincerely,

For INFOSYS LIMITED

MOEF/COMPLIANCE-REPORT-IIPM/2023-24/02

27th October 2023

To,
The Director(s),
Ministry of Environment and Forests,
Government of India, Regional Office (South Zone),
Kendriya Sadan, IV Floor, E & F wings,
17th Main Road, II Block, Koramangala,
Bengaluru – 560034.

Dear Sir/Madam,

Sub: Submission of Six-monthly compliance report (from April 2023 to September 2023) of completed construction project at Sy. No 40(P) & 41(P) of Electronics City Phase 2 Industrial area, Konappana Agrahara, Begur Hobli, Bengaluru South taluk, Bengaluru.

Ref 1: Environmental clearance vide No. SEIAA:194: CON:2015 dated 30th May 2016

As per the requirement of the above environmental clearance, we are submitting the following half yearly reports for your perusal.

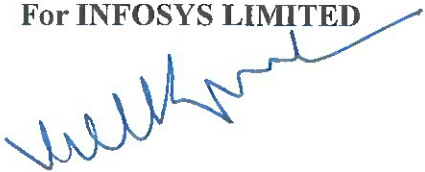

Annexure 1: Compliance report with status
Annexure 2: Ambient air quality reports
Annexure 3: Ambient noise monitoring reports
Annexure 4: DG stack monitoring reports
Annexure 5: STP water analysis reports

COMPLIANCE TO EC CONDITIONS

M/s Infosys Limited

Sy. No 40(P) & 41(P) of Electronics City Phase 2 Industrial area, Konappana Agrahara, Begur Hobli, Bengaluru South taluk, Bengaluru-560100

Part A- SPECIFIC CONDITIONS

Sl. No	EC Conditions	Compliance Status
I. Construction Phase		
1	Set up an environment management cell and ensure that the cell manages / maintains all the environmental aspects such as sewage treatment, solid waste disposal, maintenance of green belt areas, etc., and in case the commercial space is sold / leased, then enter into an agreement with the prospective buyers to ensure that they maintain the cell and take care of all environment concerns during the operation phase of the project. In addition, sufficient fees should be levied to raise a corpus fund to maintain the Environment cell.	Project construction is completed and adhered to EC conditions.
2	Appoint an Environment and safety engineer during the construction phase to take care of environment and safety aspects.	
3	The project proponent should ensure that during the construction phase utmost care is taken to ensure that there is no noise nuisance, no air and water pollution and no disturbance to the nearby inhabitants. In case of violation, the project construction activity may have to be directed to be stopped.	
4	The project proponent should cover the project site from all sides by raising sufficiently tall barricades with sheets to ensure that pollutants do not spill to the surroundings.	
5	Provide at the main entrances bell gates, which are located at least 12' inside the boundary of the project to enable smooth flow of traffic on the main road leading to the entrance.	
6	All required sanitary and hygienic measures should be in place before starting construction activities and to be maintained throughout the construction phase. Enough toilets/ bathrooms shall be provided with required mobile toilets, mobile STP for construction work force.	
7	A First Aid Room should be provided in the Project both during construction and operation of the project.	
8	Adequate drinking water and sanitary facilities should be provided for construction workers at the site. The safe disposal of wastewater and solid wastes generated during construction phase should be ensured.	
9	Provision shall be made for the housing of construction labourers within the site with all necessary infrastructures. The housing may be in the form of temporary structures to be removed after the completion of the project. The facilities shall include the creche.	
10	Provision should be made for the supply of fuel (kerosene or cooking gas); utensils such as pressure cookers etc. to the labourers during construction phase.	
11	All the labourers to be engaged for construction should be screened for health and adequately treated before engaging them to work at the site and detailed report submitted to SEIAA. Safety standards as per National Building Code (NBC) should be ensured.	
12	For dis-infection of wastewater, which is not meant for recycling for toilet flushing, use ultraviolet radiation and not chlorination. For treated wastewater meant for reuse for toilet flushing, disinfect by using chlorination.	

13	All the topsoil excavated during construction activities should be stored for use in horticulture / landscape development within the project site.
14	Disposal of muck, construction debris during construction phase should not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
15	Soil and ground water samples should be tested at the project site during the construction phase to ascertain that there is no threat to ground water quality by leaching of heavy metals and or other toxic contaminants and report submitted to SEIAA.
16	Construction spoils, including bituminous material and other hazardous materials, must not be allowed to contaminate watercourses and the dumpsites for such material must be secured so that they should not leach into the ground water.
17	The diesel generator sets to be used during construction phase should be of low sulphur diesel type and should conform to E (P) Rules prescribed for air and noise emission standards.
18	Vehicles hired for bringing construction material to the site should be in good condition and should conform to the applicable air and noise emission standards and should be operated only during non-peak hours.
19	Ambient noise levels should conform to the residential standards both during day and night. Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase. Adequate measures to reduce air and noise pollution during construction keeping in mind CPCB norms on noise limits.
20	Fly ash should be used as building material in the construction as per provisions of Fly ash Notification of September 1999 and amended as on August 2003.
21	Ready mixed concrete must be used in building construction
22	Storm water control and its re-use as per CGWB and BIS standards for various applications.
23	Water demand during construction should be reduced by use of pre mixed concrete, curing agents and other best practices
24	Only tertiary treated water shall be used for construction as per G.O. No. FEE 188 ENV 2003 dated 14.08.2003 and in terms of the orders of the Principal Bench of Hon'ble National Green Tribunal, New Delhi dated 4th May 2016 in original application No.222 of 2014. The project proponent shall identify a suitable source of treated water for construction and submit an MOU/ Agreement with such suppliers. If so, the supplier identified shall be responsible for treatment of water with appropriate technology to the standards required for construction purpose.
25	No ground water is to be drawn without permission from the Central Ground Water Authority.
26	Separation of grey and black water should be done by the use of dual plumbing line for separation of grey and black water.
27	Treatment of 100% grey water by decentralized treatment should be done.
28	Fixtures for showers, toilet flushing, and drinking should be of low flow either by use of aerators or pressure reducing devices or sensor-based control.
29	Use of glass shall not exceed 40% of exposed area to reduce the electricity consumption and load on air conditioning. If necessary, use high quality double glass with special reflective coating in windows.

30	The provision of Energy Conservation Building code, 2007 shall be fully complied with.
31	Roof should meet prescriptive requirement as per Energy Conservation Building Code, 2007 by using appropriate thermal insulation material.
32	Opaque wall should meet prescriptive requirement as per Energy Conservation Building Code, 2007 which is proposed to be mandatory for all air-conditioned spaces while it is optional for non-air-conditioned spaces by use of appropriate thermal insulation material to fulfil requirement.
33	Facilities such as ramps and separate parking shall be provided for the benefit of physically challenged.
34	The project shall be made operational only after necessary infrastructure/connection for water supply and sewerage line is provided and commissioned by Competent Authorities
35	The project authority shall maintain and operate the common infrastructure facilities created including STP and solid waste management facility efficiently.
36	The project authority shall incorporate a suitable condition in the sale/rent Agreement/ Deed to be made with the buyers/ occupiers that they holds the responsibilities jointly with other users to maintain common infrastructure facilities created including STP and solid waste management facility.
37	The Proponent shall obtain the construction material such as stones and jelly etc. only from the approved quarries and other construction material shall also be procured from the authorized agencies/ traders.
38	The proponent shall obtain approval from the competent authorities for structural safety of the building due to earthquake, adequacy of firefighting equipment etc. as per the National Building Code (NBC) including protection measures for lightening etc.
39	The project authorities shall ensure that no water bodies are polluted due to project activities.
40	Safety standards as per National Building Code (NBC), 2005 should be followed and ensured.
41	The project Authorities shall ensure that the National Building Code, 2005 is fully complied with and adhered to.
42	The project authorities shall not use Kharab land if any for any purpose and keep available to the general public duly displaying a board as public property. No structure of any kind be put up in the Kharab land and shall be afforested and maintained as green belt only.
43	The project authority shall obtain NOC before commencement of the construction activity and clearance after the completion of the construction from the Fire and Emergency Services Department, if Applicable.
44	The project Authorities shall ensure the time specification prescribed by the Honorable High Court of Karnataka in WP. No. 1958/ 2011 (LB - RES - PIL) on 04.12.2012 for different activities involved in construction work.
45	The proponent shall take up the construction activity only after obtaining NOC from BWS&SB or clearance from the competent authority for assured supply of water as the case may be.

46	The project authorities shall ensure that the construction activity is undertaken strictly in accordance with the approved site plan / layout drawing annexed to this Environmental Clearance letter. However, it is subject to compliance to the provisions of local authorities regarding setbacks, FAR etc. Shall be adhered to.	
47	The existing water body, canals and Rajakaluves and other drainage and water bound structures shall be retained unaltered with due buffer zone as applicable and maintained under tree cover.	
48	The project proponent shall leave a buffer of 75 Meters from the Lakes, 50 Meters from Primary Rajakaluve, 35 Meters from the Secondary Rajakaluve and 25 Meters from Tertiary Rajakaluve in Accordance with the order of the Principal Bench of Hon'ble National Green Tribunal, New Delhi dated 4th May 2016 in original application No.222 of 2014 in addition to sufficient buffer from the other water bodies in Accordance of law. The buffer so maintained shall be developed as Green belt planting with indigenous tree species such as Neem, Akash Mallige, Mahagoni, Honge, Kadamba Ficus, etc. and maintained as green belt. No construction activity shall be undertaken in the said buffer zone.	
49	The natural sloping pattern of the project site other than the area excavated for the purpose of construction of proposed building shall remain unaltered and the natural hydrology of the area be maintained as it is to ensure natural flow of storm water	
50	Lakes and other water bodies within and/ or at the vicinity of the project area shall be protected and conserved.	
51	The construction and demolition waste shall be handled and disposed off in accordance with construction and demolition waste management rules-2016.	
II. Operation Phase.		
1	The installation of the Sewage Treatment Plant (STP) of total capacity 140 KLD should be carried out before the construction of the second floor of the main structure is commenced and the plant shall be got certified by an independent expert and a report in this regard should be submitted to the SEIAA immediately. Discharge of treated sewage shall conform to the norms & standards of the Karnataka State Pollution Control Board. Treated sewage should be used for flushing, gardening, etc. as proposed, using dual plumbing line.	Sewage treatment plant of 110KLD capacity is installed and commissioned to treat the generated sewage and meet the KSPCB urban reuse standard for flushing, gardening, and HVAC usage.
2	Rainwater harvesting for roof run-off with 230 Cum capacity of tanks at ground level for rainwater collection and also surface run-off harvesting as per the plan submitted should be implemented with 8 No's recharge pits and pre-treatment must be done to remove suspended matter, oil and grease before recharging the surface run off.	Combination of Recharge pit, injection wells & de-silting pit are implemented for harvesting rainwater.
3	Ensure that the excess runoff rainwater from the greenbelt area, which is irrigated by treated water, does not get into recharge pits and contaminate the ground water. Such excess flow should be safely let into the storm water drains.	Proper care has been taken, not to contaminate the ground water from the excess runoff rainwater from the greenbelt area, which is irrigated by treated water, and excess runoff will be safely discharged to external storm water drain.

4	The solid waste generated should be properly segregated insitu. The Biodegradable organic waste be composted by installing bio- converter in site and used. The non-biodegradable waste be disposed to the authorized recyclers.	The generated solid wastes are collected in separate bins and non-biodegradable wastes are disposed through authorized recyclers. Biodegradable organic waste generated is collected and treated at our centralized Organic Waste Converter.
5	Any hazardous waste including biomedical waste should be disposed off as per the applicable Rules and norms with necessary approvals of the Karnataka State Pollution Control Board.	The hazardous wastes are stored separately in leak proof containers and are disposed through authorized recyclers/reprocessors. Bio medical wastes are collected and disposed through authorized incinerators.
6	The project proponent shall develop a minimum of 33 % of the project area for green belt. If the area for increasing the green belt is not available then the proponent shall compensate by undertake planting in the civic amenity area such as school, playground and avenue plantation in addition to the proposed in house area of 3,621.23Sqm (24.49% on total plot area) and 1,329.85Sqm on Podium. The proponent shall undertake plantation of heavy foliage indigenous tree species such as Mahagoni, Honge, Neem, Akash Mallige, Kadamba, Ficus and Ashoka, etc at an escapement of 3 mts x 3 mts i.e. 1111plants/ hectare. The green belt design along the periphery of the plot shall achieve attenuation factor confirming to the day and night noise standards prescribed for residential land use. The open spaces inside the plot should be suitably landscaped and covered with vegetation of indigenous variety.	Project area is covered with green belt with combination of different types of native trees, shrubs, ground covers.
7	Incremental pollution loads on the ambient air quality; noise and water quality should be periodically monitored after commissioning of the project.	Ambient air quality & Noise monitoring are carried on quarterly basis. Water quality is monitored on a Monthly basis.
8	Application of solar energy should be incorporated for illumination of common areas, lighting for gardens and street lighting in addition to provision for solar water heating. A hybrid system or fully solar system for the complex should be provided. Details in this regard should be submitted to the SEIAA.	Solar photo voltaic plant is installed on the roof tops and the same is utilized in the building for meeting electricity needs. The layout of street & building maximizes the potential for solar energy devices. Solar street lightings are installed in common area, landscape area.
9	Traffic congestion near the entry and exit points from the roads adjoining the proposed project site must be avoided. Parking should be fully internalized, and no public space should be utilized.	Car parking facility is provided in basement area and MLCP, no public space has been used for parking.

10	A Report on the energy conservation measures conforming to energy conservation norms finalized by the Bureau of Energy Efficiency should be prepared incorporating details about building materials & technology, R & U Factors etc and submit to the SEIAA in three months' time.	Submitted during construction phase
11	All toilets should have dual plumbing line for using treated water and no wastewater is discharged from the unit.	Dual piping system is implemented for use of STP treated water for flushing.
12	The Environment Management Plan including the human health and Safety management plan and Fire Safety and Protection plan proposed by the proponent shall be strictly implemented.	EMP's are executed considering various Environment, Health, Safety & Fire protection activities.
13	The proposed building shall have D.G. Set of 3 Nos. X 750 KVA as an alternate power supply source as proposed.	Project area is provided with 3 X 600KVA DG sets as an alternate power supply.
14	The project Authorities shall submit an undertaking to the Authority with regard to availing water supply through pipeline for the operating phase and not through tankers.	Obtained BWSSB connection for water supply.
PART - B. GENERAL CONDITIONS:		
1	The Environmental safeguards contained in the application should be implemented in letter and spirit.	Complied
2	All commitments made by the proponents in their application, and subsequent letters addressed to the SEAC/SEIAA should be accomplished before the construction work of the project is completed.	Complied
3	Half yearly monitoring reports should be submitted to the SEIAA and the APCCF, Regional Office, MoEF, Bengaluru.	Complied
4	Officials from the Department of Environment and Ecology, Bengaluru / APCCF, Regional Office of MoEF, Bengaluru who would be monitoring the implementation of Environmental safeguards should be given full cooperation, facilities and documents / data by the project proponents during their inspection. A complete set of all the documents submitted to MoEF / SEIAA should be forwarded to the APCCF, Regional Office of MoEF, Bengaluru / Department of Environment and Ecology, Bengaluru.	ok
5	In the case of any change(s) in the scope of the project, the project would require a fresh appraisal by this Authority.	Adhered to EC condition
6	Concealing factual data or submission of false/ fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and strict action under the provisions of Environmental (Protection) Act, 1986.	Adhered to EC condition
7	The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environmental clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.	Ok
8	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department, Forest Conservation Act, 1980 and Wildlife (Protection) Act, 1972 etc. shall be obtained, as applicable by project proponents from the competent authorities.	Approvals obtained from Fire Department, KSPCB under Air, Water and Hazardous waste management

9	The project proponent should advertise in at least two local Newspapers widely circulated in the region, one of which shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the Karnataka State Pollution Control Board and may also be seen on the website of the SEIAA, Karnataka at http://www.seiaa.kar.nic.in or http://seiaa.karnataka.gov.in , http://environmentclearance.nic.in . The advertisement should be made within 7 days from the day of issue of the clearance letter and a copy of the same should be forwarded to the APCCF, Regional Office of the MoEF at Bengaluru/ Department of Environment and Ecology, Bengaluru.	Advertised
10	The project proponent should display the conditions prominently at the entrance of the project on a suitable size board for the information of the public.	Displayed condition on the board at the entrance of project site.
11	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.	Ok
12	These stipulations would be enforced among others under the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.	Adhered to EC condition
13	Under the provisions of Environment (Protection) Act, 1986, legal action shall be initiated against the project proponent if it is found that construction of the project has been started without obtaining environmental clearance.	Construction work has been started after obtaining Environmental clearance
14	The issuance of Environment Clearance doesn't confer any right to the project proponent to operate/ run the project without obtaining Statutory clearances/sanctions from all other concerned authorities.	Adhered to EC condition and obtained statutory clearances/sanctions from the concerned authorities
