## PART -F

Please specify the characteristics (in terms of concentration and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

Waste is segregated at source. A color code for bins has been devised and implemented for different types of waste.

The color codes are as follows:

- Green for bio-degradable waste
- Red for toxic waste
- Blue for dry recyclable waste
- Grey for e-waste

A focused approach to solid waste management has resulted in better disposal systems. Solid waste included all the Non-hazardous waste viz., paper/ cardboard waste, plastic waste, metal waste, wood waste and garden waste.

### Hazardous waste:

- Used Oil / filters / oil-soaked cotton waste – Sent to registered KSPCB authorized recyclers as per Hazardous Waste Rules
- Batteries – will be sent to registered KSPCB authorized battery recyclers.

Waste category	Total Quantity		Concentration	Disposal Practice
	During the current Financial year (FY 2021-22)	During the current Financial year (FY 2022-23)		
Batteries	Nil	Nil	Solid	The waste is disposed to authorized KSPCB recycler.

- E-waste – will be sent to registered KSPCB authorized recyclers as per E-Waste Rules.

Waste category	Total Quantity		Concentration	Disposal Practice
	During the current Financial year (FY 2021-22)	During the current Financial year (FY 2022-23)		
E-waste	Nil	Nil	Solid	The waste is disposed to authorized KSPCB recycler.

- Biomedical waste: Generated biomedical waste is disposed to authorized vendors. Toiletries, sanitary waste, tissue papers, masks & gloves are disposed to registered KSPCB authorized incinerator.

Bio-medical waste Category	Total Quantity (Kgs/A)		Concentration	Disposal Practice
	During the current Financial year (FY 2021-22)	During the current Financial year (FY 2022-23)		
Yellow Bag Blue Bag Red Bag White Bag	NA	NA	Solid	NA

**Non-Hazardous waste:**

- Waste like paper, plastic, metal, wood and glass are segregated disposed to registered recyclers/ re-processors for further disposal. All the generated solid waste is stored and disposed through main campus. We have a centralized storage in the main E City Campus
- Dry sludge – Generated sludge from domestic sewage is sent to main campus & used as manure.
- Food waste: All the food waste generated is collected in designated color-coded bins and sent to our Biogas plant and Organic waste converter.

***PART-G***

*Impact of the pollution control measures taken on conservation of natural resources and consequently on the cost of production.*

- Low Sulphur diesel is used for DG sets.
- Rooftop solar system installed. The campus is using solar energy generated at our solar plant as a major source.
- We are ensuring 100% segregation of waste at source, stored, and disposed as per applicable legal legislation.
- Occupancy sensors are installed in the buildings to reduce the utilization of power.
- We have installed pressure reducing valves in taps and pipes and flow restrictors which resulted in reduction of water consumption.
- Rainwater harvesting system implemented to reduced consumption of fresh water.

## ***PART - H***

*Additional measures/investment proposal for environmental protection including abatement of pollution.*

- Infosys has been certified to ISO 14001 :2015.
- Process optimization is followed to reduce our energy and water consumption.
- We continue to spread awareness among the employees on the conservation practices.
- We are ensuring 100% segregation of waste at source, stored, and disposed as per applicable legal legislation.
- We have installed Solar panels of total capacity 236.64 KWP.

## ***PART-I***
