

Date: 25th June 2019

To,

The Member Secretary

Chandigarh Pollution Control Committee

Paryavaran Bhavan

Madhya Marg

Sector-19 B

Chandigarh- 160019

Sub: Submission of Environmental; Statement from 1st April 2018 to 31st March 2019

Dear Sir,

We hereby submit the Environment Statement as provided under rule 14 of the Environment (Protection) rules 1986 for the financial year 2018-19 ending 31st March 2019.

Thanking You,

For Infosys Limited

Shantanu Ghosh

Regional Manager- Facilities

Encl: Form V, Form 2, Form 10 and copy of the test report for treated sewage and DG set emission.

ANNEXURE

ENVIRONMENTAL STATEMENT FORM-V
(See rule 14)

Environmental Statement for the financial year 2018-19 ending with 31st March 2019

PART-A

- i. Name and address of the owner/ occupier of the industry:* **Infosys Technologies Limited
Plot No.1, Rajiv Gandhi Technology
Park, Kishangarh, Chandigarh.**
- Operation or process:* **Software Development**
- ii. Industry category Primary-(STC Code) Secondary- (STC Code)* **N.A**
- iii. Production category. Units:* **Software Development**
- iv. Year of establishment:* **2006**
- v. Date of the last environmental statement submitted:* **7th June 2018**

PART-B

Water and Raw Material Consumption:

i. Water consumption in m³/d

- Process:* **N.A**
- Cooling:* **N.A**
- Domestic:* **300 m³/d**

Enclosures:

- 1) Copy of Test Report for Treated Sewage
- 2) Copy of Test report for D.G set emissions
- 3) Form 10 for the Used oil, DG filters, oil soaked cotton disposed, Chemicals cans disposed
- 4) Form 2 for the E waste disposed

Name of Products	Process water consumption per unit of products output	
	During the previous financial year	During the current financial year
1.	N. A	
2.		
3.		
4.		
5.		
6.		

ii. Raw material consumption.

Name of raw materials*	Name of Products	Consumption of raw material per unit of output	
		During the previous financial year	During the current financial year

** Industry may use codes if disclosing details of raw material would violate contractual obligations, otherwise all industries have to name the raw materials used.*

PART-C

Pollution discharged to environment/unit of output
(Parameter as specified in the consent issued)

Software Industry

Pollutants	Quantity of Pollutants discharged (mass/day)	Concentration of Pollutants discharged (mass/volume)	Percentage of variation from prescribed Standards with reasons.
(a) Water	-	-	-
(b) Air	-	-	-

PART-D

HAZARDOUS WASTES

(As specified under Hazardous Wastes (Management & Handling Rules, 1989).

Hazardous Wastes	Total Quantity (Kg)		
	During the financial year (2016-17)	During the financial year (2017-18)	During the current financial year (2017-18)
1. From Process	Used Oil=1055 Liters E waste=2059 Kg Batteries=0 no's DG Filters=275 kg(134 numbers) Oil soaked cotton=20 kg	Used Oil=750 Liters E waste=2545 Kg Batteries=456 no's	Used Oil=859 liters DG Filters=112 no's Oil soaked cotton=32 kg's E waste= 19075 kg's
2.From Pollution Control Facilities			

PART - E

SOLID WASTES:

Solid Wastes	Total Quantity (Kg)		
	During the current financial year(2015-16)	During the current financial year(2016-17)	During the current financial year(2017-18)
a. From process	N.A	N.A	N.A
b. From Pollution Control Facility	Dry section sludge is used as manure in the campus	Dry section sludge is used as manure in the campus	Dry section sludge is used as manure in the campus.
c. Quantity recycled or re-utilized within the unit.	19.44 kg of average paper/cardboard waste is generated on daily basis which is sent for recycling.	18.46 kg of average paper/cardboard waste is generated on daily basis which is sent for recycling.	19.51 kg of average paper/cardboard waste is generated on daily basis which is sent for recycling.

PART -F

Please specify the characteristics (in terms of concentration and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

Sludge – Used as manure for landscaping

HW	2017-18	2018-19	Authorized Vendor	Disposal Method
Used oil	750 liters	859 liters	Golden Petro	Distillation with clay treatment is done which results into lube oil production
E waste	2545 kg's	19075 kg's	Green tek reman/ Nirvana Recycling	Metal extraction plant is installed in their premises and the recycled commodities are resold in the market
Batteries	456 no's	0 no's	Gravita Metals Inc.	Dismantling plant is installed in the factory where the Zinc part of the battery is recovered and reused and other parts are reused in making new batteries.
Chemical Cans	970 kg's	1122 kg's	Kamal Enterprises/ Lucky enterprises	Cleaned with chemicals properly in the ETP plant installed in their factory premises, reused after sealing the products. Cans/containers which are not properly cleaned are melted and reformed into other form for further usage.
DG filters	0	112 no's	Bharat Oil and Management	Incineration
Oil soaked cotton	0	32 kg	Bharat Oil and Management	Incineration

PART-G

Impact of the pollution control measures taken on conservation of natural resources and consequently on the cost of production

1. All the waste generated in the campus is collected in the scrap yard and sold to recyclers
2. Paper waste is shredded and sold to recyclers. One side blank pages are used as rough pads
3. Hazardous waste like Used Oil, E waste, DG filters etc. is sold to authorized recyclers
4. Yearly targets are set to reduce the consumption of natural resource (Water, Electricity and paper)

Objective	Results
Trees plantation inside the campus for better biodiversity	229 trees planted in 2018-19
Zero Waste to landfill	<ul style="list-style-type: none">- Reduction in disposable to 98%- 200 kg per day capacity of Composter plant is in operation- Scrap Vendors are audited as per Infosys standard requirements
Forums within Infosys to create awareness and drive the environment initiative	Teams formulated to drive the awareness camps in different fields
Zero discharge campus	All the waste water generated is routed to Sewage Treatment Plant with Single Membrane Bio-Reactor technology, the treated water is used for landscaping and flushing system

5. Training sessions are provided to employees and the contract staff on optimal use of the natural resource
6. LED and sensor lights are used in the campus
7. In the last year, 2332.7 KL of rooftop rain water is being used in the process, thus reducing the freshwater consumption. 15 numbers of injection wells constructed inside the campus to recharge the underground water by harvesting the rain water.
8. All the waste water generated in the campus is recycled in the campus through Sewage Treatment Plant and treated water is used for landscaping and flushing in buildings.
9. Our natural resource consumption has come down in last three years when we calculate on per person basis. Converted 100% of external lights within the campus into LED lights, thus saving 0.75% of power consumption annually in the campus, along with 100% workstation lights inside the buildings
10. Converted 180 urinals inside SDB into waterless urinals thus saving 5% of water consumption/capita along with utilization of recycled water for flushing in washrooms.
11. Various meeting rooms converted to VC room for better employee interaction and a step towards saving environment.

12. Installation of smart irrigation system throughout the campus for better utilization of recycled water in landscape area as per the plant requirement.
13. Regular review meetings are conducted to keep a check on the progress of the EMS
14. Monthly internal audits are conducted by certified lead auditors on EMS
15. All the critical equipment are under AMC, this helps to keep them efficient thus decreasing the pollution
16. Installation of de-composter for the processing of food waste and garden waste into manure for re-using in Plantation area.

Other initiatives to conserve water

- Timer control for hot water supply in the hostels
- Replacement of GI pipes with Polypropylene-Random Copolymer (PPR) pipes
- Retrofit in nozzle size in dishwashing machines at food courts, which consumes less water when compared with manual wash
- Consumption of recycled water in flushing

Use / Development of clean technologies

Energy conservation measure:

- 3M Fasara film has been provided in west facing side of both the buildings (SDB1 and 2). This concept helped in stopping the sunrays and not letting in the building's interior. This helped in reduction of temperature by 5 degrees, suitable for working inside the buildings.
 - Campus is now enabled to run partly on self-generated power during the day. This building now has green energy powering its basic lighting load in the form of power generation through solar panels.
- Plant Rating - 200 KW
 - Solar Plant Technology - HIT (Hetrojunction with Intrinsic thin Layer)
 - Solar Panel Capacity - 325 W Each
 - Total Numbers of Solar Panels Installed - 624 No's.
 - Average Power Generation Capacity - 1050 Units Per Day

PART - H

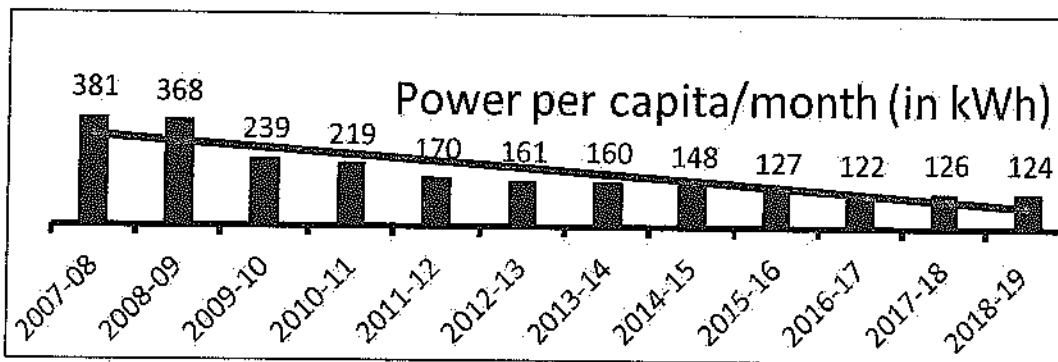

Additional measures/investment proposal for environmental protection including abatement of pollution

- Infosys has been certified compliant to ISO 14001 & ISO 18001 (OHSAS)
- Energy conservation practices implemented
- Efforts have been taken to minimize the use of plastics/ Thermocol within the campus
- Sustainability has been at the core of our business philosophy. Infosys Sustainability Report is published annually. Our sustainability report provides an update on the responsible business practices across social, environmental and economic parameters in accordance with the GRI 4.0 framework for the year 2016-17. It delineates our sustainability agenda across three areas — social contract, resource intensity, and green innovation.

Objective	Strategy	Results
Reduction in per capita power consumption	<ul style="list-style-type: none"> - To maintain performance in terms of per capita electricity consumption same as FY17 - Replacement of Old MH lights with LED lights. - Phasing out of R22 refrigerant with more environment friendly R410A - Installation of Building Management System 	Reduction of 3 % as compared to FY 2017-18
Reduction in per capita water consumption	<ul style="list-style-type: none"> - Installation of waterless urinals - Installation of Online digital water meters to monitor continuous water consumption and detect any leakage. - Reuse of recycled water in flushing system in buildings, thus reducing the consumption of raw water. - Rain water harvesting and reuse of 1608KL of water into the process. 	Reduction of 5 % as compared to FY 2017-18
Plantation of trees	<ul style="list-style-type: none"> - In-house Nursery is developed to cater the demand - Created dedicated Herbal garden and Orchard. 	226 trees planted in 2018-19
Zero Waste to landfill	<ul style="list-style-type: none"> - Replacement of disposables - In-house composting and generation of manure for landscape purpose - Vendor audit and evaluation of recycling efficiency 	<ul style="list-style-type: none"> - Reduction in disposable to 96% - 200 kg per day capacity of Composter plant is in operation - Vendors are audited as per Infosys standard requirements
Rain water harvesting	<ul style="list-style-type: none"> - Creation of injection wells at suitable location - Routing of surface runoff water to injection wells through storm water drains - 15 injection wells are created along with 100 kl capacity system of rain water harvesting system 	In the last year, 2322.7 KL of rain water is being used in the process, thus reducing the freshwater

	<ul style="list-style-type: none"> - Usage of recycled water for flushing in the buildings thus reducing the overall consumption of fresh water in the campus 	consumption In 2018-19, 8526 KL of recycled water used in flushing
Forums within Infosys to create awareness and drive the environment initiative	<ul style="list-style-type: none"> - Drive the initiative through and by the employees with management support. 	
	<ul style="list-style-type: none"> - ARPAN for all sustainability related activities. - VOY (Voice of Youth) driving thru various campaigns - Eco club Team which works with consultants to implement to the latest technologies available. - HALE (Health Assessment and Life Enrichment) - E waste drive and pollution check drive conducted by the Eco-club 	

Power consumption trend analysis

- Operational controls in AHU and auxiliaries as per the actual requirements
- Replacement of outdoor VRV with new advanced technology units in buildings
- Closure of Laundromat facility, shut down of complete laundry on Saturdays.
- Maintenance activities like descaling and brushing of condenser in chillers for better efficiency.

Water consumption trend analysis

- Implementation of Rain water collection and recycling with 100 KL capacity and till now 2322 KL of rain water has been used in flushing from April 2018 to March 2019
- Use of STP recycled water in ECC and SDB-2 buildings for flushing
- Closure of 2 floor completely in GH
- Closure of Laundromat facility, shut down of complete laundry on Saturdays

- Installation of Energy efficient burners in kitchen which results in low thermal efficiency.
- Digitization in agriculture via using Hydroponics farming which is a method of growing plants without soil and reduce water consumption usage. Under development
- Cleanliness drive conducted in Chandigarh IT park area on 15th November 2018.
- Celebration of World Environment day on 5th June 2018
- Hazardous waste recycler's process audit conducted.
- Implementation of Smart Consumable tracker for tracking the consumables items leading to reduction in paper wastage, in turn helping in optimization of stock.
- Awareness among employees about Road safety regulations in coordination with local traffic police and Chandigarh administration.
- Celebrated National Safety week via conducting awareness activities among employees like HSE training sessions, Skit, Safety March, Quiz Competition etc.
- Eliminating/Reducing single use plastic inside the campus for sustainable development.
- Re-use of old plastic bottles for plantation throughout the campus
- Replaced all plastic plates being used by the vendor in FC
- In process for complete replacement of plastic planter boxes to Di-plast Fiberglass planter boxes
- E waste Collection drive to disposed the household E waste to authorized recycler

PART-I

MISCELLANEOUS:

Any other particulars in respect of environmental protection and abatement of pollution

Water is used in kitchens, toilets and the domestic sewage generated is recycled through Sewage Treatment Plant and recycled water is used for Landscaping, flushing and cleaning of paths. Dry sludge is used as manure in the campus

LED lights in place of halogen lights and CFL's is being used in the campus.

We have made conscious effort to switch over to refrigerants with a zero ODP and this has resulted in the use of R410A, R407C and R134A.

Food waste generated from the food court is being treated in the Composter along with garden waste for manure production and in turn being used in landscaping.

The waste bins are identified with colour codes, awareness trainings are in place to ensure proper segregation at the source.

The disposal paper cups, bowls, plates etc. are replaced with reusable containers, which has drastically reduced our waste generation.

Reduction in the generation of:

I. Effluents

Following are few of the clean technologies implemented to minimize generation of waste water:

- Flow restrictors for water taps, showers and health faucet
- Water less urinals are used as a pilot project.

II. Emissions

- Low sulphur diesel is used for DG sets.
- Diesel boiler is replaced with Steam boiler.

III. Hazardous / solid waste

- The food waste generated is routed to in-house 200 kg per day capacity composter plant. The manure generated is being used in landscape area.
- The disposables paper cups and plates are replaced with reusable cups and plates. This has helped us in eliminating all the waste and in turn reduction in paper waste generation.
- Placed awareness signage near the dishwasher and food waste collection area to aware the employees for generating less food waste.

Steps for reuse / recycle of waste:

Waste is segregated at source by colour coded bins. The waste is routed to scrap yard and segregated waste is kept in designated locations for disposal. Waste generated is disposed through authorized vendors. For hazardous waste the vendors with necessary approvals from CPCC only entertained.
